11	Hope of Family beneficiaries attend weekly parental coaching classes	0%	100%
12	Hope of Family beneficiaries and community members attend the community library	0%	80%

EXECUTIVE SUMMARY

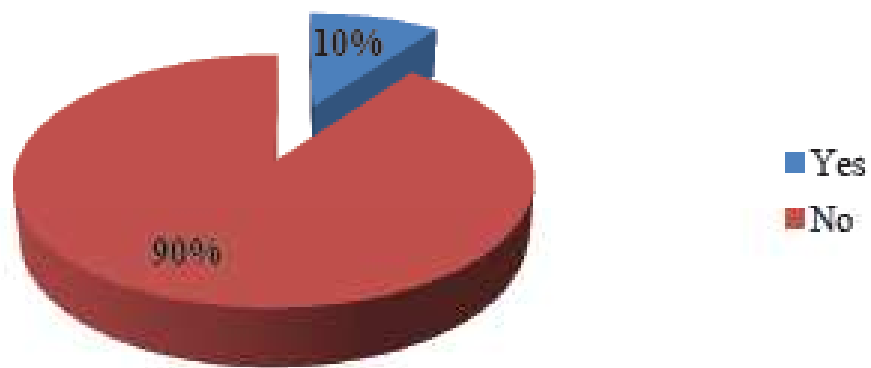

This report presents the findings from Baseline and Midline of Hope of Family project Evaluation. Since October 2018, Hope of Family selected around 100 vulnerable families under the assistance of the local leaders of Shyogwe sector for joining Hope of Family project as beneficiaries for the timeline of two years and they will be graduated in May 30th,2020 . From November to December 2018, Hope of Family has been conducting the baseline survey on 100 vulnerable families (beneficiaries) living in Kabungo and Nyakabingo villages, Kinini cell, Shyogwe sector, Muhanga district in rural Southern Province of Rwanda where Hope of Family is implementing its project activities. The purpose of that baseline survey was to evaluate the level of families' livelihood and socioeconomic status as well as to determine parent's involvement in their children's education. Moreover, Hope of Family provides to the 100 vulnerable families the support for improving their children's education and family livelihoods. Hope of Family has conducted also Midline project evaluation on 100 families's beneficiaries for evaluating project impact towards enhancing children educational and family livelihoods after 12 months of project activities implementation. This Midline project evaluation has been conducted in November 2019. The results are presented under project's objectives regarding project achievements. The results show that the average family size was 5 family members, 67 % of heads of families were females and 33 % were males. The student's school performance for academic year 2019 has been increased at 3% due to Hope of Family project support.

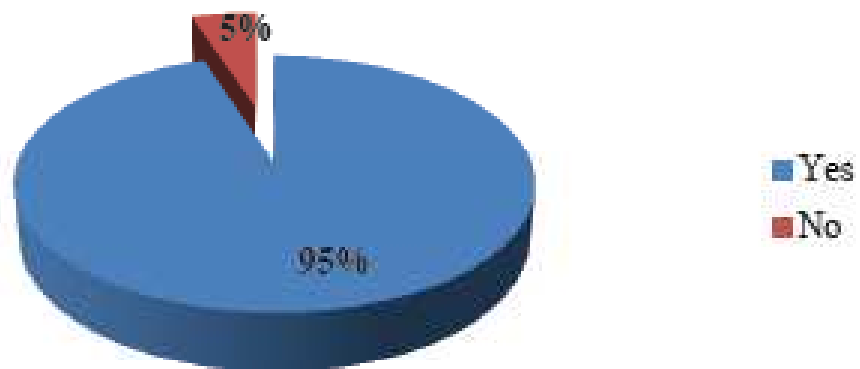

Objective One :Provide wrap-around education support to children from vulnerable families

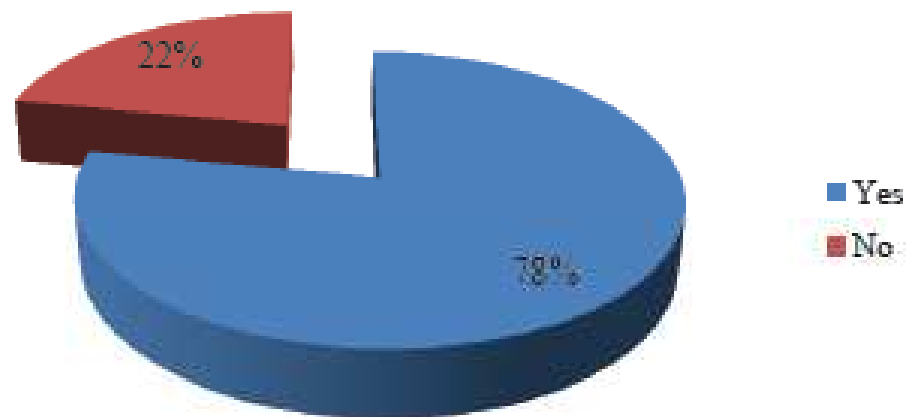

Availability of enough school materials for students (Baseline)

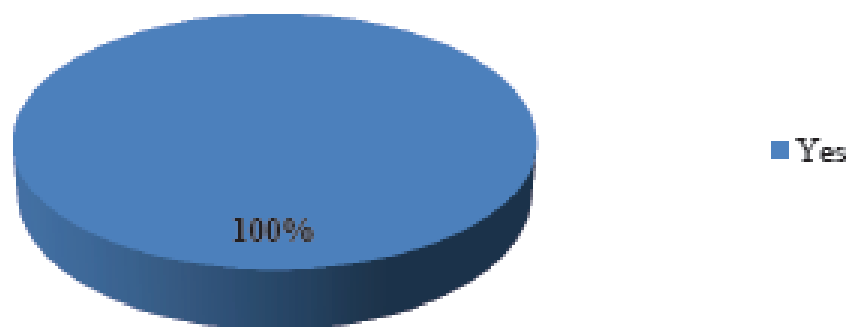

Availability of enough school materials for students(Midline)

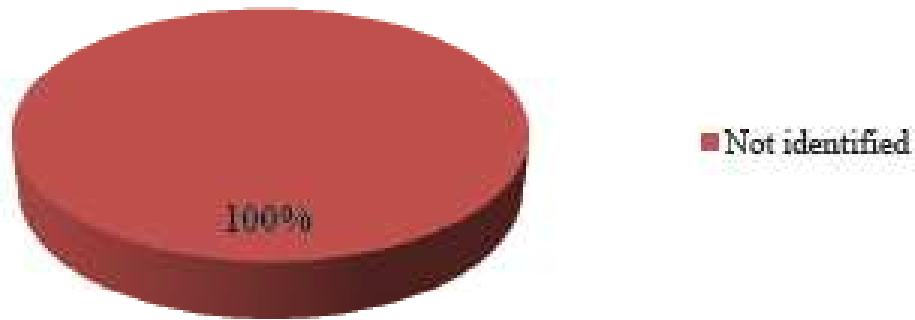

Students who were at primary school for academic year 2018(Baseline)

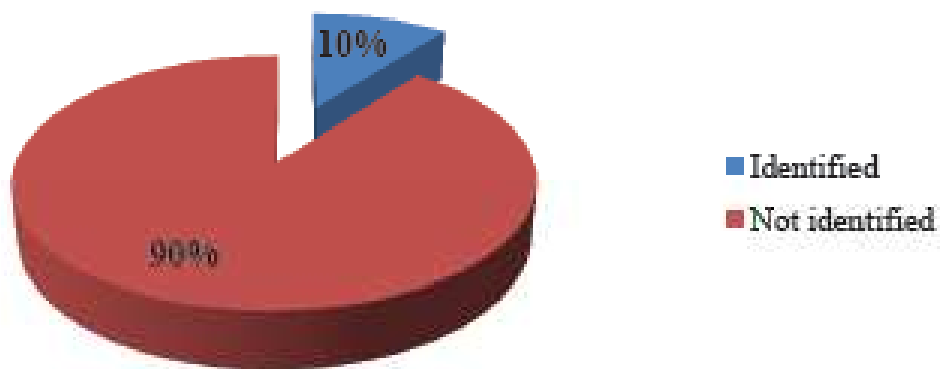

Students who are at primary school for academic year 2019(Midline)

Student Children's talents identified(Baseline)

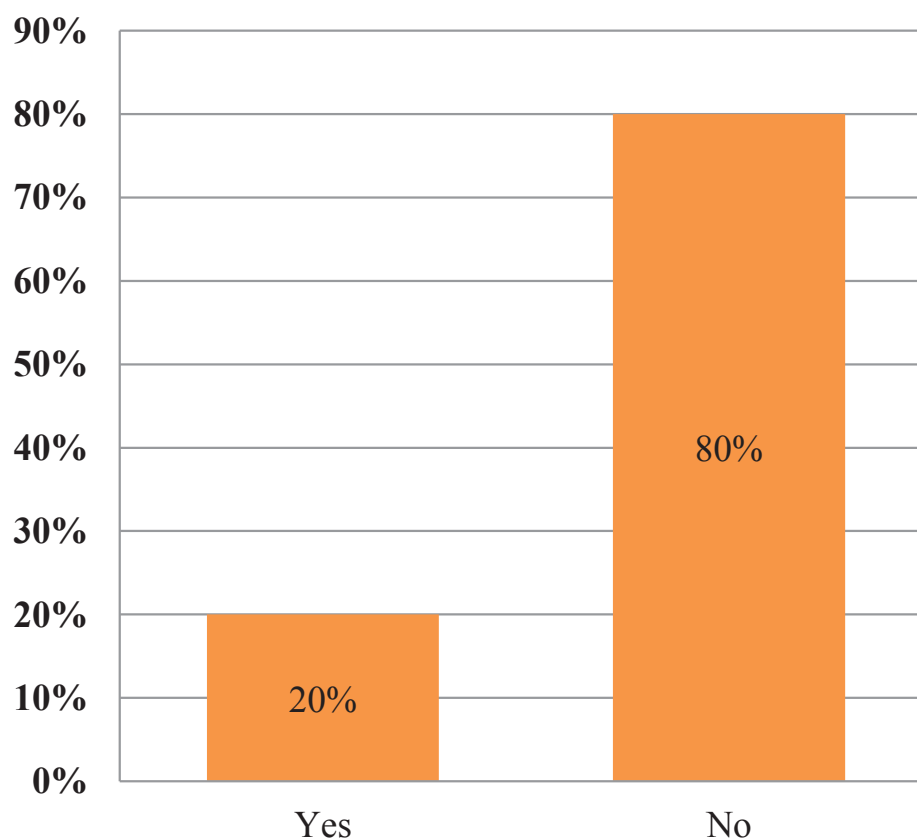

Student children's talents have been identified(Midline)

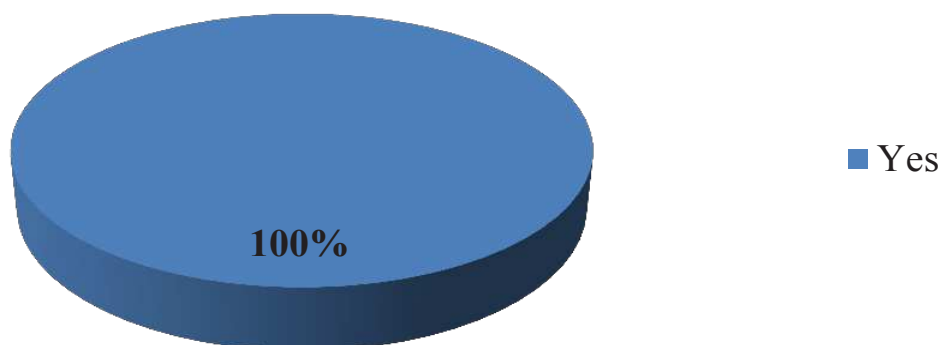

Objective two: Improve children's basic education performance by involving more their parents

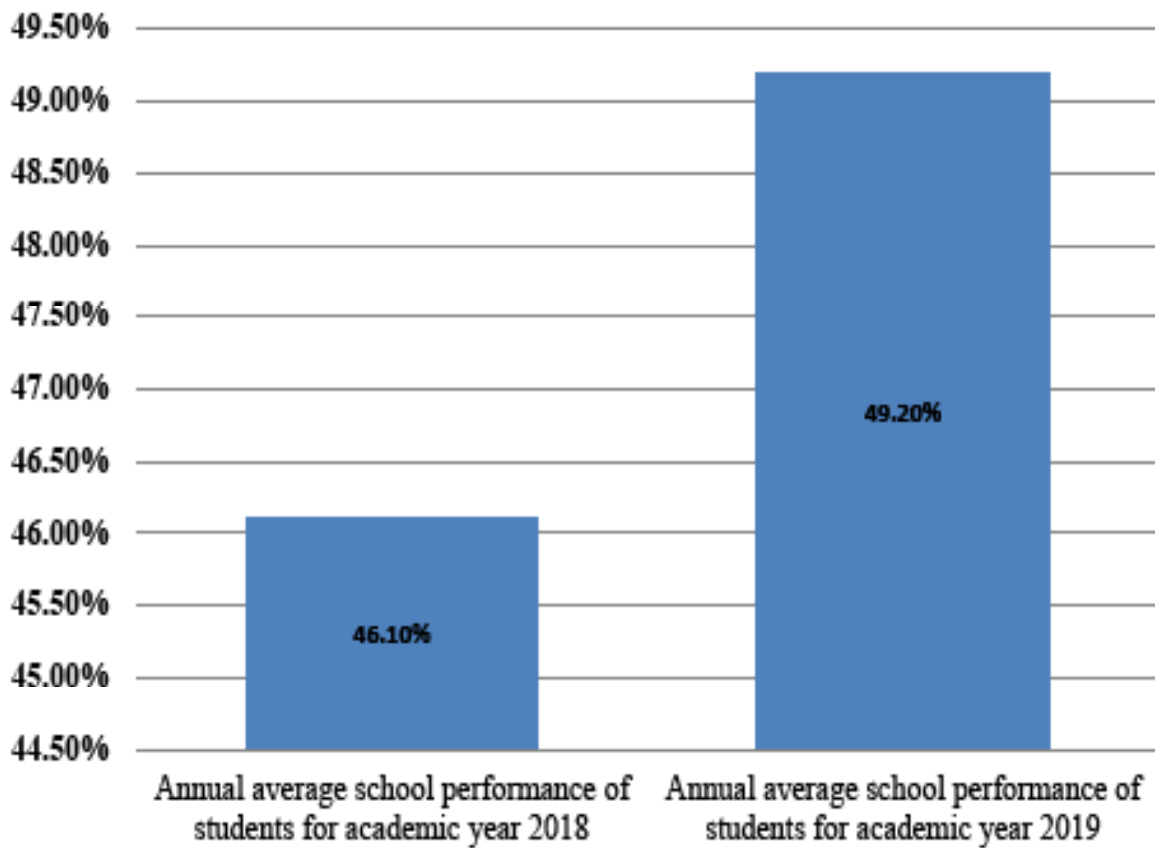

Parents visited their children at school(Baseline)

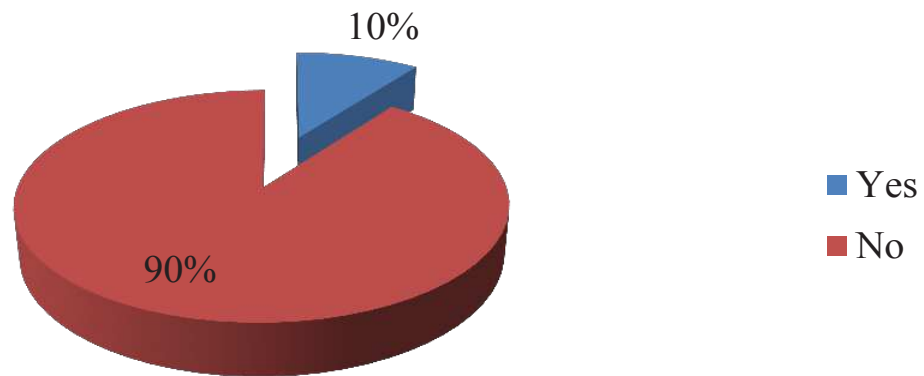

Parents visit their children at school(Midline)

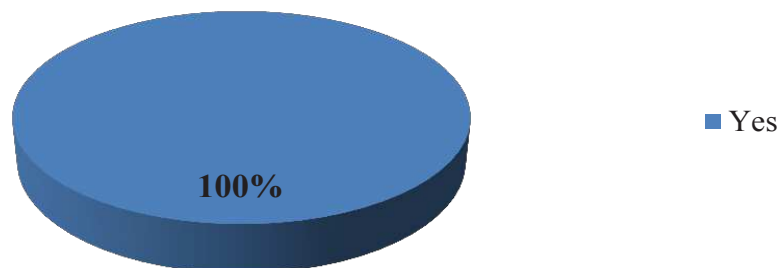

Student's school performance

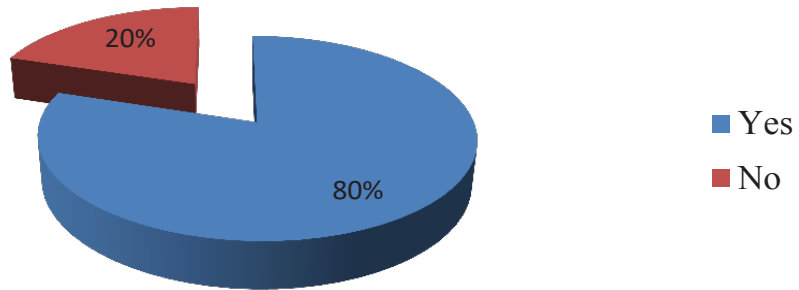

Parents provided revision time of lessons to their children at home(Baseline)

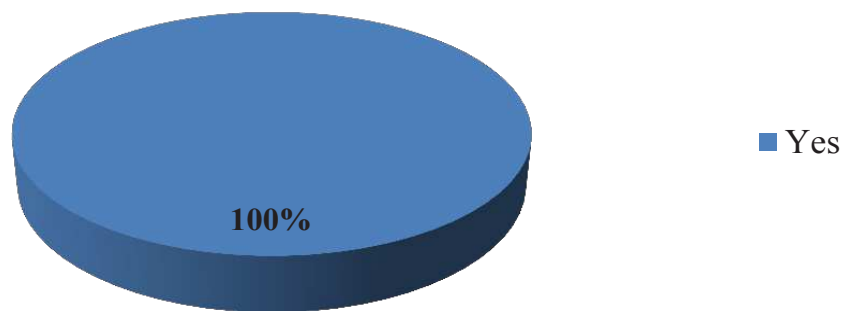

Parents provide revision time of lessons to their children at home(Midline)

Households have kitchen gardens in their homestead(Midline)

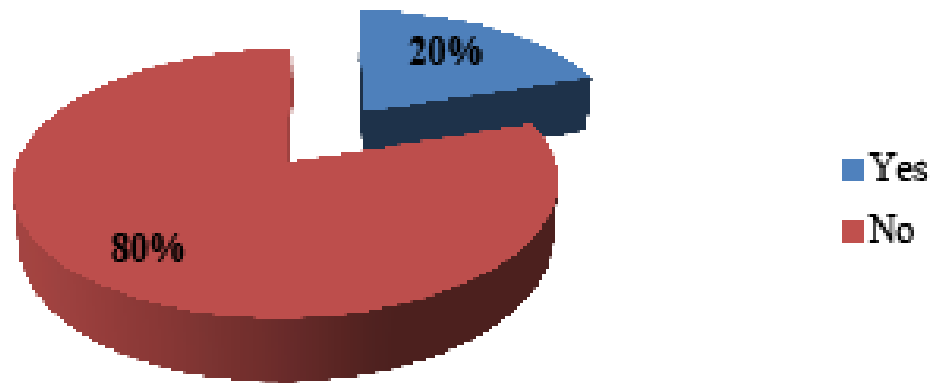

Households had smart and clean Toilets at home(Baseline)

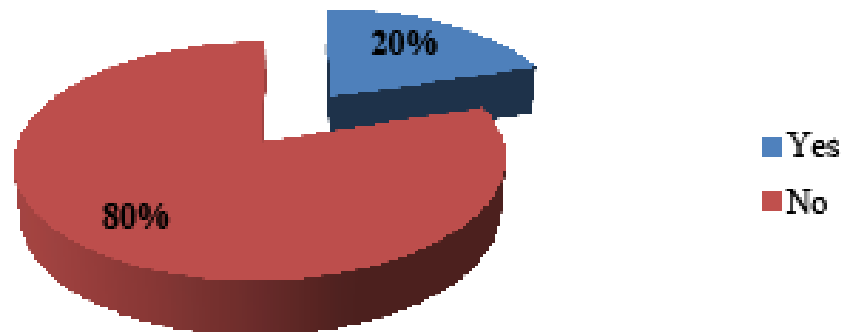

Households have smart and clean Toilets at home(Midline)

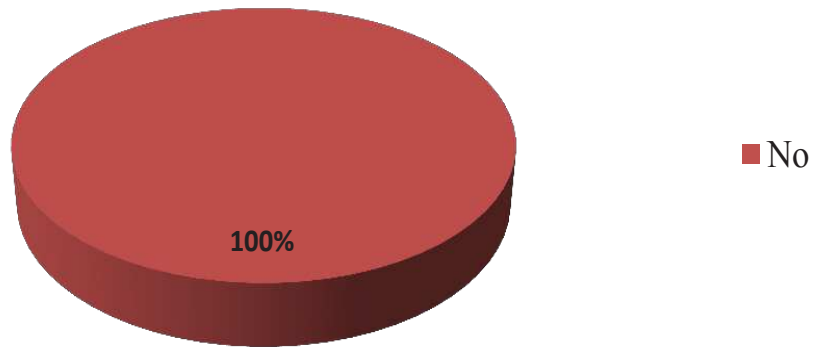

Households had smart and clean houses(Baseline)

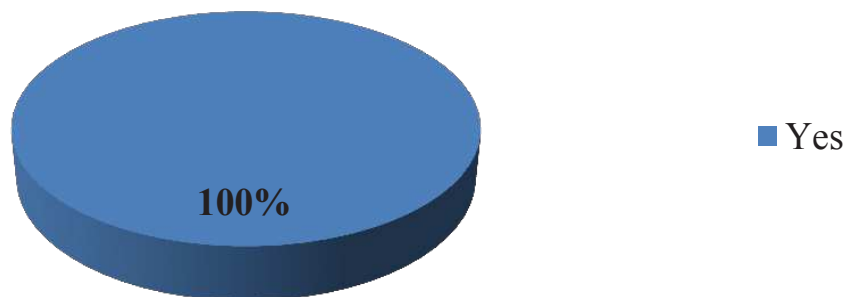

Households had smart and clean houses(Midline)

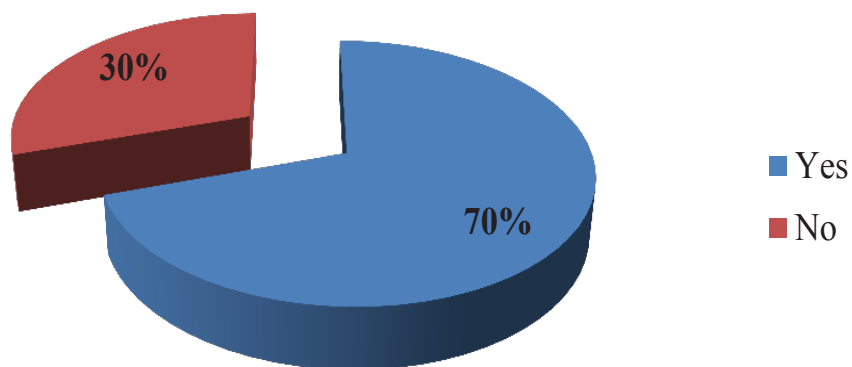

Households had Hand Washing tools at home(Baseline)

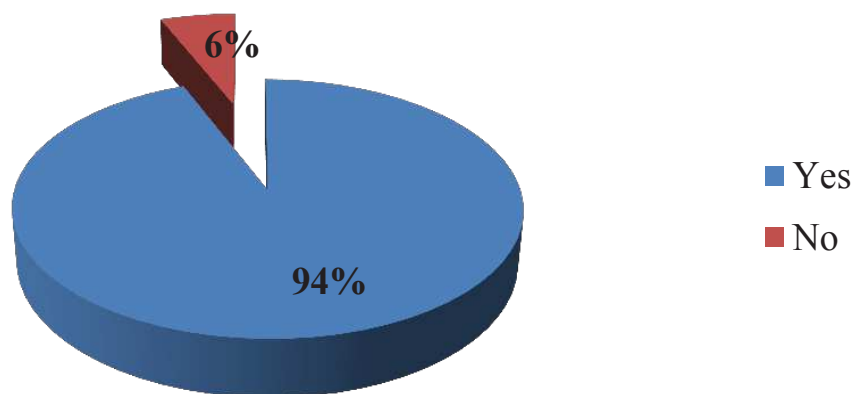

Households have Hand Washing tools at home(Midline)

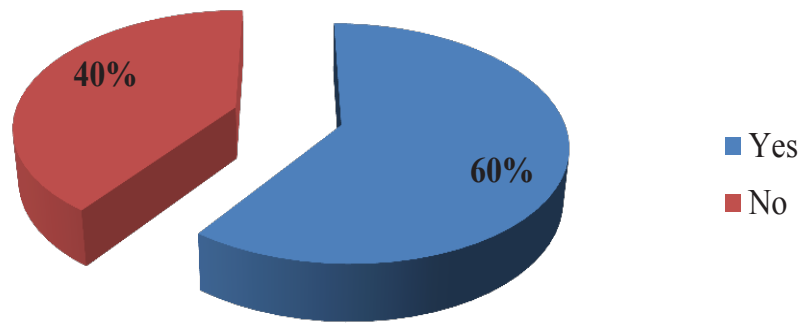

Households made saving culture in community saving group(Baseline)

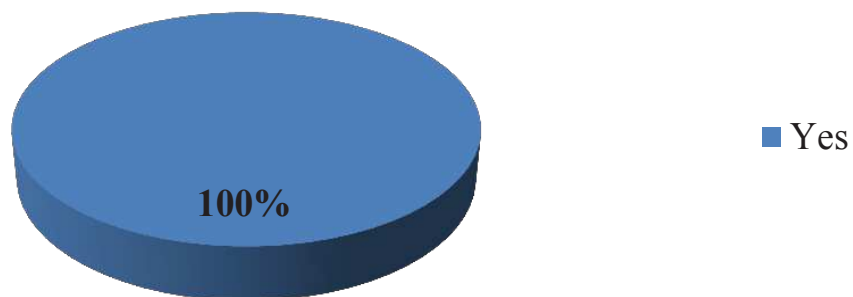

Households make saving culture in community saving group(Midline)

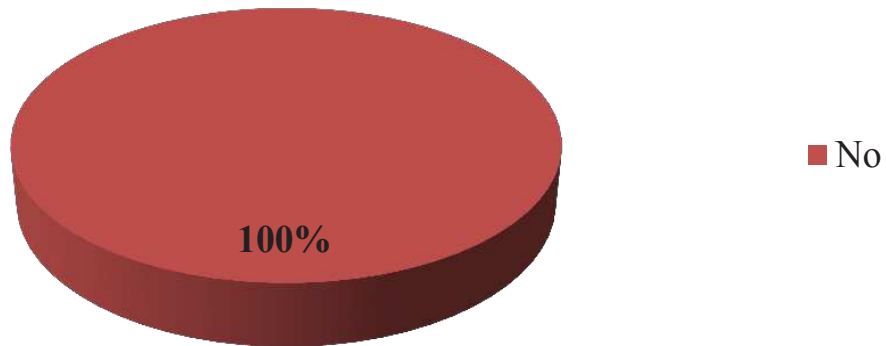

Households had Medical Insurance in 2018/2019(Baseline)

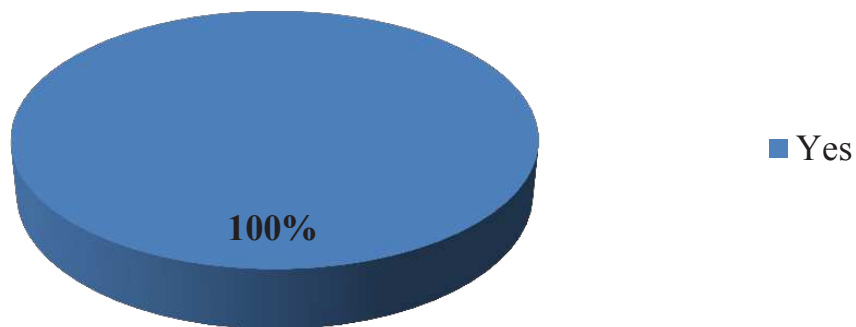

Households have Medical Insurance in 2019/2020(Midline)

Households had communication tools like Phone and Radio(Baseline)

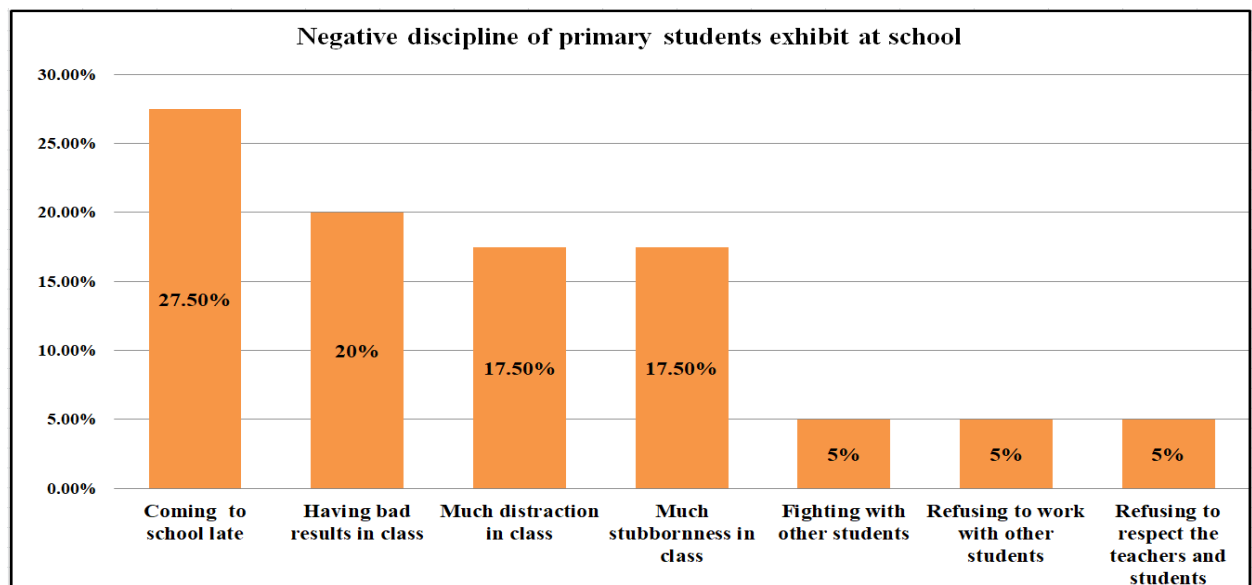

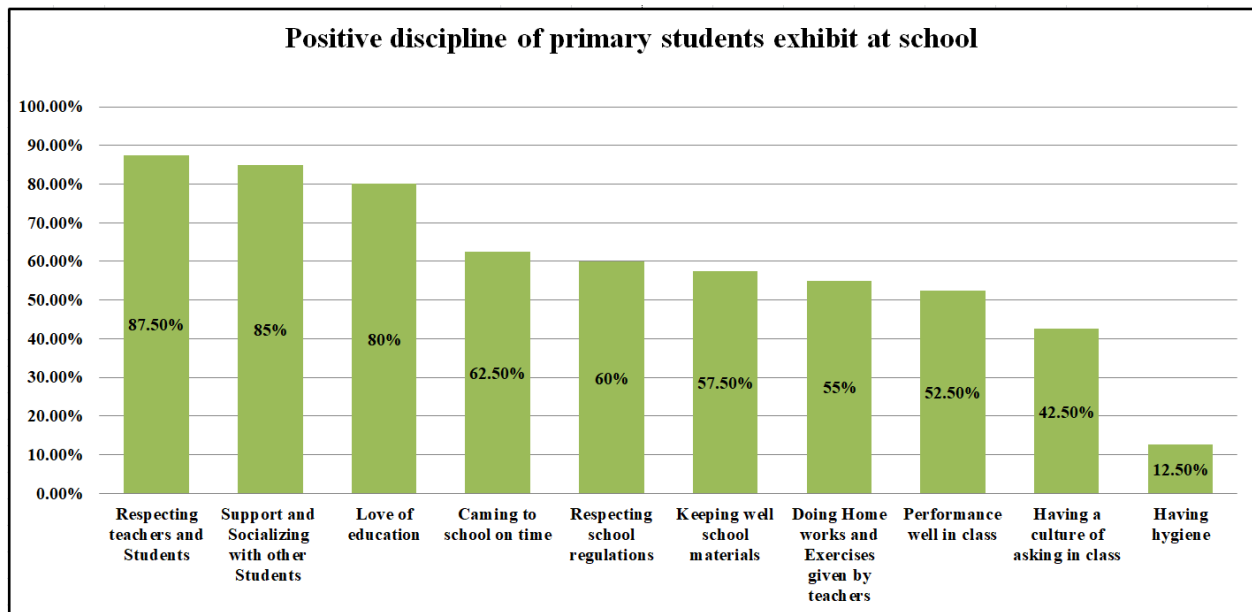

Households have communication tools like Phone and Radio(Midline)

FINDINGS OF CHILDREN BEHAVIOUR ASSESSMENT AT SCHOOL

Hope of Family has been also conducted children behaviour assessment at school in November 2019 for the 20 teachers from E.P Mbare and GS S^t Etienne Shyogwe primary school where 40 students supported by Hope of Family project are taking their studies. The 20 teachers have been participated in this assessment by answering questions related children behaviour at school. The purpose of this assessment was to monitor and evaluate the student's children behaviors at school. The findings from 20 teachers show that 35 out 40 students (that is 87.5%) respect their teachers and other students while the 11 out 40 students (that is 27.5%) come at school late.

Our Mission:

The organization mission is to reduce extreme family poverty through supporting child education and family livelihoods.

Our Vision:

Families that live decent life with appropriate and timely involvement in their children education
